Summary

Data-driven Business Analyst with 4+ years of experience specializing in business development operations and strategic growth. Expert in SQL, Excel, and Data Analysis, with a proven track record of driving actionable insights through Tableau and PowerBI. Skilled at performing quantitative Market Research and pipeline analysis to support high-level decision-making in healthcare and financial sectors.

Work Experience

Data Scientist

June 2026 – Present

MEDIGENIX HEALTH, HEALTHCARE ANALYTICS • HYBRID (WI)

- Analyze healthcare datasets as part of a 6-person analytics team, building automated pipelines to identify business development opportunities and emerging market trends for executive leadership.
- Research and develop predictive statistical models that support strategic growth initiatives and data-backed business decisions.
- Validate data integrity across multiple sources to ensure accuracy in Market Research reports and business development pipelines.
- Built 5 interactive Tableau dashboards with automated data refreshes, giving cross-functional teams self-serve insights into sales operations and growth strategies.

Senior Data Analyst

December 2023 – May 2026

FLUXTEK SOLUTIONS, FINANCIAL SERVICES / INSURANCE • REMOTE

- Analyzed business development pipelines and operational capacity using SQL and PowerBI to identify SLA breaches and support strategic growth decisions.
- Maintained advanced Excel semantic models and Power BI infrastructure for 120+ partners, automating manual data analysis processes to save 900+ analyst hours annually.
- Re-engineered SQL stored procedures and Snowflake views, improving query performance by 30% to support real-time research into sales operations.
- Managed Microsoft Dynamics 365 F&O (ERP) and Salesforce CRM reporting data, leading UAT cycles and gathering requirements to drive business development efficiency.

Data Analyst

January 2021 – April 2022

HCL TECHNOLOGIES, HEALTHCARE INSURANCE (PAYOR) ENTERPRISE • HYDERABAD, INDIA

- Conducted data analysis on 80K+ billing records using Tableau, surfacing insights that reduced billing errors by 15% and optimized revenue cycle performance.
- Applied quantitative Market Research and trend analysis to operational data, partnering with leadership to drive fixes for business development bottlenecks.
- Coordinated an analyst pod to transition fragmented reporting into a structured lifecycle, establishing a

single source of truth for strategic growth metrics.

- Researched and implemented outlier detection methodologies to improve data-backed growth strategies across the healthcare enterprise.

Education

M.S. in Computer Information Systems

New England College, Henniker, NH

May 2022 – November 2023

B.Tech. in Civil Engineering

R.V.R. & J.C. College of Engineering, India

June 2017 – May 2021
